

**APTECH**

# Advancing AV experiences

# Advancing AV experiences for AV consultants, integrators, and your clients.

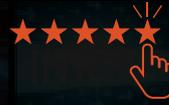

At APTECH, we understand that integrators and specifiers thrive on their ability to create compelling AV experiences that make good business sense.

It's why everything we do is about helping you to advance AV experiences.

We know that great products are essential, but they are just the start of what's necessary. Everything must provide configuration control and setup simplicity. Products must deliver predictable performance and reliability. Support has to be accessible, responsive and helpful. Plus, everything must be in stock and delivered when needed.

It's better business that makes it easier to get things done.

That's how APTECH helps advance AV experiences.

**Great products**

**Professional performance**

**Robust reliability**

**Configuration control**

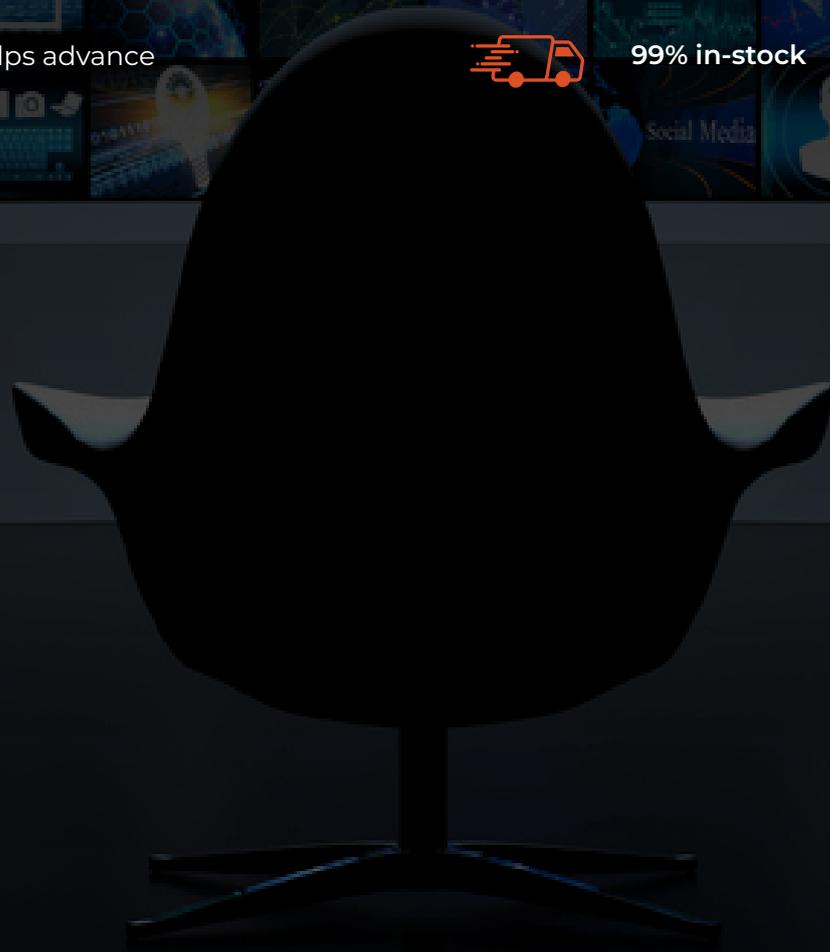

**Setup simplicity**

**Responsive support**

**99% in-stock**

# Industry experience

Live and online events

Education

Corporate and SME

Justice Courts

Government HALL

Religion

APTECH products are at the centre of some of Australia's largest AV projects across courtroom jurisdictions, university lecture AV and more.

We're equally at home in smaller-scale integrations where value for money is the main target.

Whatever your industry, APTECH brings sophisticated AV technology that combines quality, reliability and configuration control with installation and user simplicity.

All of our brands bring smarter ways of working that provide value for money without compromise.

Capture - Encode - Stream - Record -  
Switch - Distribute - Integrate -  
Automate

Advance your AV experiences.

# AV solutions and technology expertise

## High-performance live video production

Capture, switch, encode, stream and record AV from multiple local and online sources. Distribute anywhere.

## Powerful, reliable AV over IP, control and distribution solutions

AV control and distribution, along with the choice of connectivity and protocols, is at the very core of the AV Integrator's role. APTECH has answers and solutions that deliver reliability and flexibility with innovations that make AV experiences better for AV integrators and users.

## Budget-friendly education solutions

Auto-tracking cameras, video distribution hardware, cloud-based collaboration and more. APTECH has AV products and technologies that facilitate online and hybrid education, develop educators, simplify collaboration and manage local and multi-campus video.

Epiphan Pearl Nano

Epiphan Pearl 2 Rackmount

Epiphan Pearl Nexus

## Broadcast without barriers

Create the impactful video content your brand needs with award-winning hardware solutions and cloud services.

Epiphan Pearl is a range of stand-alone, all-in-one hardware-based devices for AV switching, encoding, streaming, and recording. Powerful yet easy-to-use layouts combined with robust hardware, make Pearl the go-to choice when every frame matters.

APT AV HD570

## Professional standard video conferencing and network cameras

Designed for professional and business applications. Every product is designed and manufactured to deliver exceptional image quality, professional-standard durability, configurability, systems integration compatibility and outstanding value for money.

The range has been carefully selected and sourced from Minrray, one of the world's leading manufacturers.

Choose from a wide range of cameras that suit your project specs and budget.

AURORA VPX Series AVoIP

**The most advanced end-to-end audio-visual experiences.**

Aurora Multimedia is shaking up AV distribution and control with outright performance and ingenious ideas. For example, Aurora's new ReAX Room is a solution for Boardroom AV that reinvents user experience.

Whether you're an AV consultant, an integrator or a business looking to improve your AV experiences, it's time to stop, challenge yourself to think again, and take the Aurora challenge.

## The smarter choice pro power distribution units

Netio PDUs provide advanced power management for AV Integrators, allowing precise measurement of energy usage and control. The Watchdog function can detect Internet failures and automatically restart devices like routers and IP cameras. Remote management via Netio Cloud enhances efficiency and lowers support costs, while the Scheduler function facilitates easy implementation of 'night' or 'weekend' modes. With high industrial standards, Netio devices ensure robust reliability and reduced electrical stress, offering a superior solution for power management.

# NETIO

## Reflectivity + Robot video tools for education

Swivl's Reflectivity + Robot is a secure and easy solution for teachers to record or live stream video for coaching, self-reflection, hybrid learning, and more.

Swivl Robot is an auto-tracking base for smartphones and tablets that makes it easy to capture in-class video and audio.

Swivl Reflectivity is a powerful cloud-based portal for reflection, collaboration and coaching.

Educators love Swivl.

# Swivl

Doing business with APTECH is just like it should be. A trusted partner that helps you fulfil profitable AV integration projects and advance AV experiences for your clients.
